

# DocBot Health Pod

*India's Smartest Pre-OPD & Preventive Screening Kiosk*

---

## Transform Your Hospital's First Impression

In today's healthcare, **patients expect speed, personalization, and tech-driven care.** With the **DocBot Health Pod**, your hospital becomes a **beacon of modern, preventive, and efficient healthcare**—starting right from the moment the patient walks in.

---

## What is DocBot?

**DocBot** is an AI-powered health kiosk developed by **DocBot Private Limited**, a **DPIIT-recognized startup** based in Pune.

Backed by **CE & FDA-certified technology**, DocBot automates vitals, screening, and history-taking — all **before the patient reaches the doctor.**

---

## How It Works – Within 3 Minutes:

1. Patient walks in →
  2. DocBot screens vitals, lifestyle & symptoms →
  3. AI generates health summary + risk analysis →
  4. Doctor receives **pre-filled patient report** before consult.
- 

## Key Modules Included

### Vital Screening

- BP, Temperature, Heart Rate, SpO<sub>2</sub>

- Height, Weight, BMI
- Body Composition (10 metrics)

### Clinical History + Chief Complaints

- Patient inputs lifestyle, symptoms & history
- Doctors receive a **holistic profile**

### Invasive Tests

- Hemoglobin
- Random Blood Glucose (RBG)

### Risk Scores for Preventive Diagnosis

- Indian Diabetes Risk Score (IDRS)
- Indian Hypertension Risk Score
- WHO CVD Risk Score

### AI-Based Plans

- Personalized Diet & Fitness Recommendations
- Optional: Mental Health Screening (for corporate, college & wellness OPDs)

---

### Instant Health Reports

- Delivered via **WhatsApp | Email | SMS**
  - Integrated with **Doctor Portal** & EMR-ready
- 

### Why Hospitals Love DocBot

## 1. Save Time

- Doctors save **5–7 minutes per consult**
- No need for manual vital or history entry

## 2. Increase Efficiency

- Handle **more patients per day**
- Improved patient flow & reduced OPD congestion

## 3. Boost Clinical Accuracy

- Consistent, digital measurements
- Better diagnosis with lifestyle & risk context

## 4. Discover Hidden Conditions

- Detect undiagnosed Diabetes, Anemia, or CVD Risk
- Provide timely intervention, increase retention
